## 2022 Georgia Power Rate Case

Georgia Power wants to raise your bills. Their regulator, the Georgia Public Service Commission (PSC), will decide by December 20th how much to allow. Join Georgians from around the state in asking the PSC to put Georgia families first and deny Georgia Power's proposed bill increase.

Whether we are Black, brown or white, new Americans or long-time residents, **as Georgians we work hard for our families and deserve to come home to a warm house with the lights on.**

But right now, **Georgia Power wants to raise customer rates**, making it harder for people who already struggle to afford their bills, **so they can profit while we pay**. At the same time, Georgia Power blocks rooftop solar, **refusing to fairly credit** customers that send clean electricity back to the grid for their neighbors to use.

**Join Georgians from around the state who are coming together to fight for affordable bills for all Georgia families.**

## Make Your Comment Today!

Ask the public service commission for affordable bills and fair credit to customers with rooftop solar.

### How to be Heard

- 1- Go to <https://psc.ga.gov/public-comments/>
- 2- Enter your name
- 3- Enter the rate case docket number: 44280
- 4- Type your comment in the box.

## Tips for Powerful Comments

Share your story to make your comment personal.

- How will higher bills impact you, your family, and your community?
- How could affordable rooftop solar help you and your community?

Renew Georgia brings communities together for clean air and water, affordable bills, and good jobs, so our families can thrive.
