Florida Highlights in Q1 & Q2 2026

- Florida continues to lead the region in new passenger EV sales (618,190 cumulatively). In Q2 2026, the state's EV market share reached 9.4 percent, well above the national average of 7.4 percent and the seventh-highest share in the country.
- Florida lost $44.6 million in National Electric Vehicle Infrastructure (NEVI) funding due to congressional recissions in 2026. As the only state in the region without an updated approved NEVI plan, Florida proposed using NEVI funds for flying electric passenger drones.

[1] Sales measures include passenger EVs. Manufacturing Employment and Manufacturing Investment refer to announced jobs and investments in EV assembly, EV parts, EV charging infrastructure, batteries, critical minerals processing, and battery recycling facilities. Charging refers to publicly accessible chargers, and rankings and growth include Level 2 and DCFC. Utility Investment refers to investor-owned utilities only. For the purposes of this one pager, grant funds that have been allocated, awarded, or made available are collectively referred to as "awarded" but do not include rescissions. Totals are cumulative unless stated. EV market share is averaged between July 1, 2025 and June 30, 2026.

Florida: Remains an EV Sales Leader
